GURU USA

CONTINUOUS EVOLUTION TOWARDS EXCELLENCE

GURU USA L.L.C. is a family business which is consolidated in construction sector with an unblemished reputation and business soundness. GURU has grown with the manufacture and marketing of waterproofing products.

GURU's concern is to incorporate innovative products based on exhaustive research into new proposals for construction solutions. Our attitude leads us to develop reliable products aimed at meeting the expectations of our customers by offering personal and technical support.

GURU is present in four continents with an excellent and professional team who has an extensive experience in waterproofing membranes, Italian shower systems built-in and all kind of accessories for working professional tile fixers. GURU guarantees the highest quality standards according to the criteria provided by the European Union and in compliance with several international certificates that have been performed by external laboratories such as IAPMO, CSTB, KIWA.

PRODUCTION

MADE IN SPAIN 100%

There are not many PET-EVA sheet manufacturers in the world and we are very proud to be one of them. The only Company that can manufacture up to 3 metres wide and 4 layer membranes.

Since the creation of waterproof products in 2007, our brand has been growing and evolving in the recent years. We have gained access to the final finishing of showers and the need to bring creativity and excellence to our shower grating has arisen.

This is the way that GURU waterproofing products were born—a brand whose products have become the best solution for waterproofing under ceramic tiles in both indoor and outdoor cladding.

Nowadays GURU is a dynamic brand that has gone beyond the company. GURU brings together, evokes, and synthesizes the past, present and future, a brand that opens a mental file, a perfect combination of innovation and tradition.

We design and manufacture our drains to the highest standards and only use the best ABS, manufactured by Repsol.

SUSTAINABILITY

WE CARE FOR THE ENVIRONMENT

RECYCLED: All our products meet the highest demands on recyclability thanks to their unique development. As an example, our drains exceed 95% of recyclability.

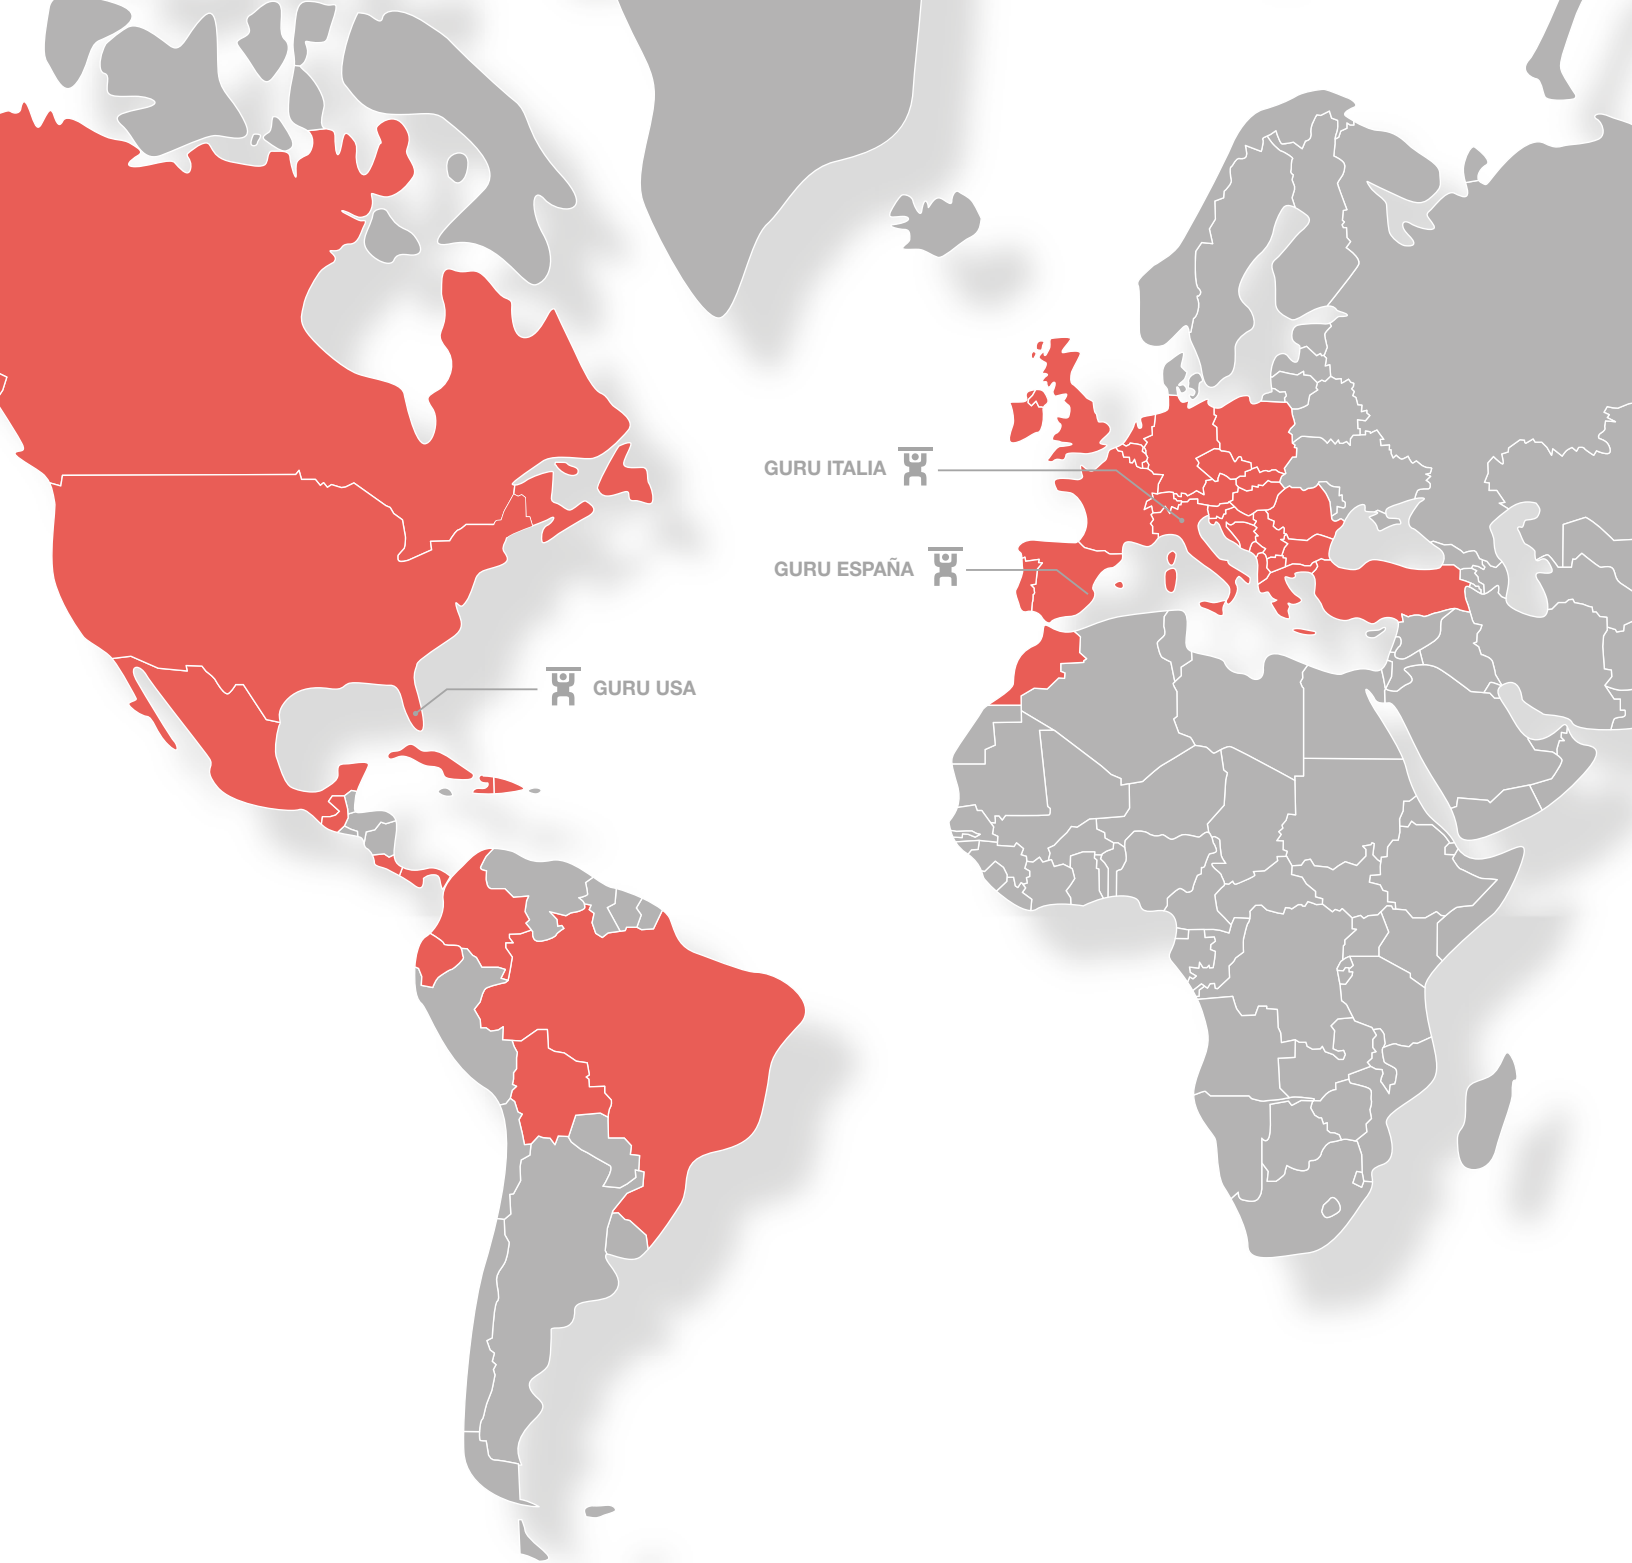

LOCALLY PRODUCED GOODS: More than 93% of our suppliers are local, resulting in 100% of the manufactured products in the EU. For instance, our production facilities are located less than 30 miles away.

RESPECT FOR THE ENVIRONMENT: At Guru, we use environmentally friendly packaging materials and have a rigorous recycling policy. Whenever possible, we use packaging made from recycled paper.

CARBON FOOTPRINT: Our product has a lower environmental impact than other systems, thanks to the modern industry practices we employ and the high standards we meet. Moreover, our product is VOC (Volatile Organic Compound)-free.

MARKETS

CONTINUOUSLY DEVELOPING TOTAL QUALITY

The range of products crafted by GURU USA not only ensures the highest quality in the market but also provides diverse options, allowing you to find precisely what you need in every market and situation.

We have positioned ourselves as leaders in the waterproofing sector, leveraging the latest technology and our highly qualified team.

FIT TO SIZE

Thanks to its trimmable design, installers can customize the length of the channel according to the shower layout, resulting in faster and hassle-free installation.

SIMPLIFIED INSTALLATION

REVOLUX comes with detailed instructions and installation videos that will make the work of installers easier.

LONG-LASTING

Revolux is manufactured from 6063 - T6 aircraft grade aluminum, making it a true warrior against corrosion. A channel that withstands the test of time like no other!

DIFFERENT DESIGNS

And for those who value style as much as functionality, we have created 2 different designs with 5 finishes in captivating colors that will create a perfect combination with the faucets and shower area in the bathroom.

HIGH EVACUATION FLOW

And best of all, the flow rate on this designs is tremendously high. Thanks to its shape the water flows straight to the drain at flows higher than 8 gallons per minute when properly installed.

Designer shower shelves made in high quality stainless steel curved. Produced in rectified thickness to fit in tile joint size from 1/32". By its engineered design and materials it has been tested in heavy duty situations and holding weights up to 50 lbs.

INSTALLATION TRAY FOR SQUARE DRAINS

1. Position the tray marking the drain position. Drill a **7 1/2"** hole.

2. Screw the drainbody in the floor with drive head screws non les than 4 mm (T20). **View heights in page 18.**
Note: In concrete installations set the drain levelled with thinset.

3. Apply thin set cement (tile adhesive) in the drain shower area with 1/4" x 1/4" notched trowel from the shower perimeter to the drain.

4. Set the W-S HEAVY DUTY SHOWER TRAY in top of the thin set before it cures and apply presure on top of it.

5. Apply thin set cement in shower area perimeter where curb will be installed. Set the curb in top of the thin set before it cures and apply presure on top of it.

6. Waterproof the walls either with WATER-STOP membrane or W-S BOARD. Connect waterproofing fixing overlapping to walls and curb applying thin set cement between both parts.

7. Use the preformed W-S Corners to seal the installation laying it and press firmly. Remove any trapped air to guarantee full adhesion by spreading the adhesive from the inside out.

8. Lift the Edge of the WATER-STOP sheet, insert the cannula of the W-S SEALANT and apply a continuous line of W-S SEALANT in the perimeter sealant area.

9. Press by hand to distribute the W-S SEALANT and clean the excess material on the edge.

10. Place the bonding flange in top of the drainbody and press it.

11. Turn it until it is flushed with the shower pan and locked.

12. Wait one hour before flood test (according to local codes) when using Guru W-S Sealant to install the corners.

13A. Set the drain receiver in the upright position for standard drain.

13B. Downward position to receive a tileable drain (INTEGRA) from the lowest height level.

14. Tile on top of the WATER-STOP membrane using the tile required notched trowel.

15. Install the tile according to TCNA handbook.

INSTALLATION TRAY FOR LINEAR DRAINS

1. Position the tray marking the drain position.

2. Cut a 4-1/2" x 4-1/2" rectangle in the wood.

3. Verify the drainpipe is at least at 1-3/8" (33 mm) of the substrate surface. Glue the drain body to the drainpipe using the proper adhesive (ABS – black or PVC – white).

4. Screw the drainbody to the substrate and check the height 3/8".
View heights in page 19.
In concrete installations set the drain levelled with thinset.

5. Apply thin set cement in the drain shower area with a 1/4" notched trowel from the shower perimeter to the drain. **RECOMMENDED THINSET ANSI A118.4, ANSI A118.11 and ANSI A118.15.**

6. Set the SHOWER TRAY in top of the tinset before it cures and apply pressure on top of it.

7. Lift the edge of the WATER-STOP sheet, insert the cannula of the W-S Sealant 1/2" and apply a continuous line of mastic in the connection drainbody – WATER-STOP.

8. Press by hand to distribute the W-S Sealant and clean the excess material on the edge.

9. Place the bonding flange in top of the drainbody and press until it is lush and locked.

10. Flood test according to local code. If W-S Sealant has been used to install the corners, the test can be performed after 1 hour.

11. Waterproof the walls either with WATER-STOP sheet or W-S Board.

12. Place the height support ring to allow adjustment of the drain height. The height may vary depending on the tile thickness.

13. Tile on top of the HEAVY DUTY SHOWER TRAY using the tile required notched trowel.

14. Adjust the height of the drain depending on the tile thickness.

15. Once tiled and grouted add the hair trap and drain strainer.

KIT FOR MUD BED SHOWER

The evolux kit is the perfect shower system for the mud slope installers that want to have the best results at the lowest cost. Very well packed, easy to carry by hand with all the materials the contractor needs besides the tile, the thin-set and grout.

 includes

1. WATER-STOP waterproofing membrane 6' 7" x 6' 7" (48 sqft)

2. PVC Square Drain Connector

3. 4x W-S DIN preformed in-corner

4. 2x W-S DEX preformed out-corner

5. Mixing Valve Seal

REF.	DESCRIPTION	MSRP
ICU3004	EVOLUX KIT BASE FOR MUDBED SHOWER	\$ 151.27

KIT FOR PRESLOPED SHOWER

Quickest preformed tray with waterproofing factory bonded. It comes with a low profile height shower drain which fits in our push fit clamping ring easily.

WATER-STOP is a **highly-flexible**, low perm multi-layer steam barrier sheet membrane 20-mil thick for bonded waterproofing applications. It is suitable to be used in conjunction with ceramic and stone tile covering for wall and floor surfaces, interior and exterior, where protection against the penetration of moisture is necessary in **new construction and renovation projects**. As a **crack isolation membrane** WATER-STOP protects ceramic tile and natural stone from limited in-plane cracks and movement. Also **ideal for use in steam showers as per its low perm rating**.

Applications include showers walls, tub surrounds, bathrooms, steam showers, commercial and residential kitchens, backsplashes areas surrounding swimming pools, balconies, etc.

REF.	DESCRIPTION	MEASURE	MSRP/SQFT	MSRP
IFU5502	WATER-STOP PRE-CUT	4' x 6' 7" = 26 sqft	\$ 2.24/sqft	\$ 58.25
IFU5501	WATER-STOP PRE-CUT	5' x 6' 7" = 32 sqft	\$ 1.94/sqft	\$ 62.00
IFU5503	WATER-STOP PRE-CUT	6' 7" x 6' 7" = 43 sqft	\$ 1.65/sqft	\$ 71.08
IFU5100	WATER-STOP ROLL	3' 3" x 16' 5" = 54 sqft	\$ 2.08/sqft	\$ 112.69
IFU5113	WATER-STOP ROLL	3' 3" x 32' 10" = 108 sqft	\$ 2.05/sqft	\$ 221.75
IFU5200	WATER-STOP ROLL	3' 3" x 98' 5" = 323 sqft	\$ 1.93/sqft	\$ 624.10
IFU5300	WATER-STOP ROLL	6' 7" x 65' 7" = 430 sqft	\$ 1.89/sqft	\$ 810.98

FORMATS

A / 4' x 6' 7" = 26 sqft

B / 5' x 6' 7" = 32 sqft

C / 6' 7" x 6' 7" = 43 sqft

D / 3' 3" x 16' 5" = 54 sqft

E / 3' 3" x 32' 10" = 108 sqft

F / 3' 3" x 98' 5" = 323 sqft

G / 6' 7" x 65' 7" = 430 sqft

W-S BOARD FOR WALLS

Lightweight construction board made of a XPS core factory bonded in both sides to WATER-STOP membrane exceeding the core dimension - creating a WATER-STOP flange.

Developed according to IAPMO PS106 for tileable kit. Certified **ANSI A118.10** and **ANSI A118.12**.

- No banding required, except for steam shower
- Superior pull-out performance
- Reduces the building time
- It requires a 1/2" width of W-S SEALANT on each side.

NEW PRODUCT

REF.	DESCRIPTION	MEASURE	MSRP
IMU9300	W-S BOARD	3' x 5' x 1/2"	\$ 48.60

W-S NICHE

Shower niche manufactured with a pre-sloped base and made of a XPS core factory bonded in both sides to WATER-STOP.

- Presloped base
- Full tile size
- Superior thinset spread
- The niches measurements correspond to the interior part, no need to cut standard ceramic tiles sizes.
- 1" Interior Shelf to maximize useful space
- 1.5% presloped

G-FLEX UNCOUPLING MEMBRANE

Waterproofing and **extra heavy duty** crack isolation membrane. G-FLEX meets and exceed the requirements of: **ANSI A118.10 (IAPMO FILE 9205) and ANSI A118.12 (IAPMO FILE 9990).**
Product accepted by IAPMO.

REF.	DESCRIPTION	MEASURE	MSRP/M²	MSRP/ROLL
ILU5100	G-FLEX ROLL	3' 3" x 45' 9" = 150 sqft	\$ 1.96/sqft	\$ 294.84
ILU5200	G-FLEX ROLL	3' 3" x 98' 5" = 323 sqft	\$ 1.84/sqft	\$ 596.32

G-Flex by Guru is a polyethylene membrane with a raised circular pattern. The back of the membrane is covered by a geotextile fiber. Acts as a **waterproofing** membrane, **compensates vapor pressure** if moisture appear on the substrate and a uncoupling membrane on critical substrates. We leave the different uses of the membrane: Food plants, dairies, breweries, airports, kitchens...

Uncoupling

Waterproofing

Vapor pressure compensation

Load distribution

Heat distribution

WATER-STOP ACCESSORIES

Reinforcements to complete safely the waterproofing. Waterproofing and crack isolation membrane in accordance with the standards: **ANSI A118.10 and ANSI A118.12**. Product accepted by IAPMO
